

Engineering, industrialisation, consulting.
We listen. We think along. We implement.

we can

This is where we are strongest:

SENSORS / IoT

- Force measurement
- IMUs / MEMS
- WiFi, BLE, LoRa, LTE, NB-IoT

MEDICAL ENGINEERING

- Development of medical devices
- Wearable Devices
- Safety and EMC acc. to 60601-1

ROBOTICS

- Embedded systems
- Autonomous Navigation
- Drone technology & eVTOL

our specifics

What we offer and why we are better:

KNOW-HOW AND TOOLS

- Electronics layout
- Firmware development
- Mechanical design

FROM IDEA TO SERIAL PRODUCTION

- Feasibility studies
- Prototype development
- Industrialisation

COMPETITIVE PRODUCT

- Product strategy
- Cost optimisation
- Time to market
